## Every Heart Beat

Forces about 8 ounces of blood out of the heart, and sends it coursing through the veins to the remotest part of the body. This is the amount required by nature to nourish and sustain your body. Every ounce less than this means a shortage in nature's supply of buildingup material. A weak heart cannot meet this demand, and consequently you suffer. If your heart skips a beat, or flutters, palpitates, pains you, or you have shortness of breath, you may be sure that the heart is working imperfectly.

Dr. Miles' Heart Cure will strengthen the heart muscles and

"I had been a great sufferer for 15 years. At the time I commenced taking Dr. Miles' Heart Cure I had been confined to my bed for four months. I had frequent sinking spells, sometimes as many as three in a day, during which my heart would seem to stop beating, necessitating the calling of a physician to resuscitate me. Before mishing the first bottle the sinking spells had cassed, and I took altogether five bottles for a complete cure. I now enjoy perfect health, and my very grateful for this wonderful medicine, for it is the means of my being with my family RDBECCA BENNET.
